

CAPELEC offers a complete range of manufacturing solutions for the CEM electronics marketplace.

Capelec is focused on the provision of fast, cost effective solutions from prototypes through to production builds.

Approved to ISO 9001 and ISO TS 16949 and following the standards set out in IPC-A610 and A620, Capelec is focused on the provision of fast, cost effective solutions from prototypes through to production builds.

The solutions we offer include:

- NPI, DfX, fast Prototyping services
- Reverse Engineering
- Failure diagnostic
- Full Supply chain services
- Full tractability solutions (coming soon)
- 3 SMT lines, AOI (fine pitch up to 01005)
- THT, Wave & Selective soldering
- 3D-Mid, Thermoplastically deformable circuits
- Xray, Flying probe, ICT & functional test
- Conformal coating for harsh environment
- Box build assembly
- Wide range of Wire harnesses & Cabling manufacturing (France and Morocco)
- In-house Special Equipment development
